

Reception Project: What's at the top? – Summer 2 2022

This term we are learning all about growing. We are launching the topic by looking at lots of different seeds and beans. We will become seed experts as we discover what makes them similar and different, we will take part in lots of different 2D mark making projects during the first week as well as learning about how they travel and using story telling to share this information.

Throughout the rest of the term we will be growing and caring for plants and learning about their life cycles. We will be using imaginative language to retell the story of Jack and the Beanstalk, reading alternative versions and beginning to develop and create our own stories to share at the end of the term.

<h1>Subject focus and coverage</h1>	
 <p>Personal Social and Emotional Development</p>	Protected characteristics, moving on/ transition
