

This statement details our school's use of pupil premium (and recovery premium for the 2021 to 2022 academic year) funding to help improve the attainment of our disadvantaged pupils.

It outlines our pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

School overview

Detail	Data
School name	Gipsey Bridge Academy
Number of pupils in school	94
Proportion (%) of pupil premium eligible pupils	28 pupils 29.7%
Academic year/years that our current pupil premium strategy plan covers (3 year plans are recommended)	2019 to 2022
Date this statement was published	December 2021
Date on which it will be reviewed	July 2022
Statement authorised by	Andrew Clarke, Executive Headteacher
Pupil premium lead	Andrew Clarke, Executive Headteacher
Governor / Trustee lead	Sean Westaway, chair of Trustees

Funding overview

Detail	Amount
Pupil premium funding allocation this academic year	£41,660
Recovery premium funding allocation this academic year	£5,090
Pupil premium funding carried forward from previous years (enter £0 if not applicable)	£0
Total budget for this academic year If your school is an academy in a trust that pools this funding, state the amount available to your school this academic year	£46,750

Part A: Pupil premium strategy plan

Statement of intent

Our intention is that all pupils, irrespective of their background or the challenges they face, make good progress and achieve high attainment across all subject areas. The focus of our pupil premium strategy is to support disadvantaged pupils to achieve that goal, including progress for those who are already high attainers.

We will consider the challenges faced by vulnerable pupils, such as those who have a social worker and young carers. The activity we have outlined in this statement is also intended to support their needs, regardless of whether they are disadvantaged or not.

High-quality teaching is at the heart of our approach, with a focus on areas in which disadvantaged pupils require the most support. This is proven to have the greatest impact on closing the disadvantage attainment gap and at the same time will benefit the non-disadvantaged pupils in our school. Implicit in the intended outcomes detailed below, is the intention that non-disadvantaged pupils' attainment will be sustained and improved alongside progress for their disadvantaged peers.

Our strategy is also integral to wider school plans for education recovery, notably in its targeted support for pupils whose education has been worst affected, including non-disadvantaged pupils.

Our approach will be responsive to common challenges and individual needs, rooted in robust diagnostic assessment, not assumptions about the impact of disadvantage. The approaches we have adopted complement each other to help pupils excel. To ensure they are effective we will:

- ensure disadvantaged pupils are challenged in the work that they're set
- act early to intervene at the point need is identified
- adopt a whole school approach in which all staff take responsibility for disadvantaged pupils' outcomes and raise expectations of what they can achieve

Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

Challenge number	Detail of challenge
1	Assessments, observations, and discussions with pupils indicate underdeveloped oral language skills and vocabulary gaps among many disadvantaged pupils. These are evident from Reception through to KS2 and in general, are more prevalent among our disadvantaged pupils than their peers.
2	Assessments, observations, and discussions with pupils suggest disadvantaged pupils generally have greater difficulties with phonics than their peers. This negatively impacts their development as readers.
3	Internal and external assessments indicate that maths attainment among disadvantaged pupils is significantly below that of non-disadvantaged pupils.
4	<p>Our assessments and observations indicate that the education and wellbeing of many of our disadvantaged pupils have been impacted by partial school closures to a greater extent than for other pupils. These findings are supported by national studies.</p> <p>This has resulted in significant knowledge gaps leading to pupils falling further behind age-related expectations, especially in maths.</p>
5	<p>Our assessments (including wellbeing survey), observations and discussions with pupils and families have identified social and emotional issues for many pupils, notably due to a lack of enrichment opportunities during school closure. These challenges particularly affect disadvantaged pupils, including their attainment.</p> <p>Teacher referrals for support have markedly increased during the pandemic. Since September '21 4 pupils (3 of whom are disadvantaged) have required additional support with social and emotional needs in addition to those with needs we knew of before the pandemic.</p>
6	<p>Our attendance data over the last 2 years indicates that attendance among disadvantaged pupils has been between 1.5% lower than for non-disadvantaged pupils.</p> <p>20% of disadvantaged pupils have been 'persistently absent' compared to 7% of their peers during that period. Our assessments and observations indicate that absenteeism is negatively impacting disadvantaged pupils' progress.</p>

Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

Intended outcome	Success criteria
Improved oral language skills and vocabulary among disadvantaged pupils.	Assessments and observations indicate significantly improved oral language among disadvantaged pupils. This is evident when triangulated with other sources of evidence, including engagement in lessons, book scrutiny and ongoing formative assessment.
Improved reading attainment among disadvantaged pupils.	KS2 reading outcomes in 2021/22 show that more than 50% of disadvantaged pupils met the expected standard.
Improved maths attainment for disadvantaged pupils at the end of KS2.	KS2 maths outcomes in 201/22 show that more than 50% of disadvantaged pupils met the expected standard.
To achieve and sustain improved wellbeing for all pupils in our school, particularly our disadvantaged pupils.	<p>Sustained high levels of wellbeing from 2021/22 demonstrated by:</p> <ul style="list-style-type: none"> • qualitative data from student voice, student and parent surveys and teacher observations • a significant reduction in bullying • a significant increase in participation in enrichment activities, particularly among disadvantaged pupils
To achieve and sustain improved attendance for all pupils, particularly our disadvantaged pupils.	<p>Sustained high attendance from 2021/22 demonstrated by:</p> <ul style="list-style-type: none"> • the overall absence rate for all pupils being no more than 6%, and the attendance gap between disadvantaged pupils and their non-disadvantaged peers being reduced. • the percentage of all pupils who are persistently absent being below 10%

Activity in this academic year

This details how we intend to spend our pupil premium (and recovery premium funding) **this academic year** to address the challenges listed above.

Teaching (for example, CPD, recruitment and retention)

Budgeted cost: **£40,000**

Activity	Evidence that supports this approach	Challenge number(s) addressed
<p>Enhancement of teaching and learning provision to ensure structured interventions, small group tuition and one to one support.</p> <p>To ensure classroom teaching is precise and of a high quality to meet the needs of disadvantaged pupils so that they make progress by meeting (or exceeding) age related national expectations.</p> <p>To ensure pupils consolidate basic skills</p> <p>To respond rapidly with targeted teaching for pupils at risk of underachievement.</p>	<p>Sutton Trust found that, 'The effects of high-quality teaching are especially significant for pupils from disadvantaged backgrounds: over a school year, these pupils gain 1.5 years' worth of learning with very effective teaching.'</p> <p>Additional adults mean pre-planned intervention groups can take place and also ad-hoc according to need.</p> <p>Research from the Education Policy Institute highlights that the disadvantage gap is around 40% by age 5. With early intervention/ screening in the early years, we aim to prevent the gap from widening.</p> <p>Pupils need a sound understanding of number bonds and times tables to free the working memory to successfully apply more complicated maths operations.</p> <p>Daniel Willingham (Psychologist at the University of Virginia) states: <i>Automatic retrieval of basic maths facts is critical to solving complex problems because complex problems have simpler problems embedded in them.'</i></p>	
<p>Embedding dialogic activities across the school curriculum. These can support pupils to articulate key ideas, consolidate understanding and extend vocabulary.</p> <p>We will purchase resources and fund ongoing teacher training and release time.</p>	<p>There is a strong evidence base that suggests oral language interventions, including dialogic activities such as high-quality classroom discussion, are inexpensive to implement with high impacts on reading:</p> <p>Oral language interventions Toolkit Strand Education Endowment Foundation EEF</p>	1

	Both early years intervention and oral language interventions can add up to an additional +5 months of progress.	
Continue to develop whole class reading strategies, with explicit use of vocabulary and speaking and listening.	<p>Phonics approaches have a strong evidence base that indicates a positive impact on the accuracy of word reading (though not necessarily comprehension), particularly for disadvantaged pupils:</p> <p>Phonics Toolkit Strand Education Endowment Foundation EEF</p> <p>EEF toolkit highlights that focusing on reading comprehension strategies and mastery learning can have an impact of +6 and +5 months of additional progress.</p> <p>EEF toolkit shows that phonics strategies can have up to +4 months of additional progress. This is based on extensive evidence and provides high impact for low cost.</p>	2
<p>Enhancement of our maths teaching and curriculum planning in line with DfE and EEF guidance.</p> <p>We will fund teacher release time to embed key elements of guidance in school and to access Maths Hub resources and CPD (including Teaching for Mastery training).</p>	<p>The DfE non-statutory guidance has been produced in conjunction with the National Centre for Excellence in the Teaching of Mathematics, drawing on evidence-based approaches:</p> <p>Maths guidance KS 1 and 2.pdf (publishing.service.gov.uk)</p> <p>The EEF guidance is based on a range of the best available evidence:</p> <p>Improving Mathematics in Key Stages 2 and 3</p>	3
<p>Improve the quality of social and emotional (SEL) learning.</p> <p>SEL approaches will be embedded into routine educational practices and supported by professional development and training for staff.</p>	<p>There is extensive evidence associating childhood social and emotional skills with improved outcomes at school and in later life (e.g., improved academic performance, attitudes, behaviour and relationships with peers):</p> <p>EEF Social and Emotional Learning.pdf(educationendowmentfoundation.org.uk)</p>	5

Targeted academic support (for example, tutoring, one-to-one support structured interventions)

Budgeted cost: **£5,000**

Activity	Evidence that supports this approach	Challenge number(s) addressed
Purchase of programmes to improve listening, narrative and vocabulary skills for disadvantaged pupils who have relatively low spoken language skills.	Oral language interventions can have a positive impact on pupils' language skills. Approaches that focus on speaking, listening and a combination of the two show positive impacts on attainment: Oral language interventions EEF (educationendowmentfoundation.org.uk)	1, 4
Additional phonics sessions targeted at disadvantaged pupils who require further phonics support. This will be delivered in collaboration with our local English hub.	Phonics approaches have a strong evidence base indicating a positive impact on pupils, particularly from disadvantaged backgrounds. Targeted phonics interventions have been shown to be more effective when delivered as regular sessions over a period up to 12 weeks: Phonics Toolkit Strand Education Endowment Foundation EEF	2

Wider strategies (for example, related to attendance, behaviour, wellbeing)

Budgeted cost: **£2,000**

Activity	Evidence that supports this approach	Challenge number(s) addressed
Embedding principles of good practice set out in the DfE's Improving School Attendance advice. This will involve training and release time for staff to develop and implement new procedures and appointing attendance/support officers to improve attendance.	The DfE guidance has been informed by engagement with schools that have significantly reduced levels of absence and persistent absence.	6
Subsidise trips, experiences, visits and activities.	To build relationships with pupils/families. To provide/locate support. To liaise with relevant services. Research tells us that families and parents are critical to pupils' attainment. Feinstein and Symons (1999) found that parental interest in their child's education was the single greatest predictor of age 16 achievement.	

	<p>An effective curriculum will be ambitious and designed to give all learners, particularly the most disadvantaged, the knowledge and cultural capital they need to succeed in life. Pupils' horizons will be broadened and they will learn more about culture, history and geography.</p> <p>Local deprivation- IDACI rating highlights that East Lindsey district is in the top 20% of most deprived neighbourhoods in the country (2019)</p>	
--	--	--

Total budgeted cost: £47,000

Part B: Review of outcomes in the previous academic year

Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2020 to 2021 academic year.

Our internal assessments during 2020/21 suggested that the performance of disadvantaged pupils was lower than in the previous years in key areas of the curriculum. Despite being on track during the first year (2019/20), the outcomes we aimed to achieve in our previous strategy by the end of 2020/21 were therefore not fully realised.

Our assessment of the reasons for these outcomes points primarily to Covid-19 impact, which disrupted all our subject areas to varying degrees. As evidenced in schools across the country, school closure was most detrimental to our disadvantaged pupils, and they were not able to benefit from our pupil premium funded improvements to teaching and targeted interventions to the degree we had intended. The impact was mitigated by our resolution to maintain a high quality curriculum, including during periods of partial closure, which was aided by use of online resources such as those provided by Oak National Academy.

Our assessments and observations indicated that pupil behaviour, wellbeing and mental health were significantly impacted last year, primarily due to COVID-19-related issues. The impact was particularly acute for disadvantaged pupils. We used pupil premium funding to provide wellbeing support for all pupils, and targeted interventions where required. We are building on that approach with the activities detailed in this plan.
